

C/C++ Software Developer

Coimbra, Porto, Leiria, Lisboa, Aveiro - Portugal

We are seeking talented Software Engineers with special skills in system programming, C/C++, distributed systems, networking and middleware for mobile apps. If you have these sort of skills and you want to develop software applications for the global market this is the opportunity you are looking for.

Key Responsibilities

- Design and develop distributed applications for the Telecom market
- Work closely with product management, other software engineers and quality teams on feature definition and release milestones
- Perform peer code-reviews and unit-testing to ensure high-quality software
- Utilize agile development methodology

Additional Information

- **Job Location:** Coimbra, Porto, Leiria, Lisboa, Aveiro (Portugal)
- **Position Type:** Full-time
- We offer a competitive compensation package as well as an environment conducive to personal and professional growth

Requirements

- BSc or MSc on Computer Science or Computer Engineering
- 3+ years development experience using C/C++
- Experience on distributed computing programming
- Master the internals of an operating system
- Experience on system-level and concurrent programming
- Knowledge of web architectures and services (HTTP, SOAP, REST, JSON, etc.)
- Knowledge about VoIP and SIP is a plus
- Strong background on networking protocols
- Experience with a version control system
- Must have excellent problem solving skills
- Must be self-motivated and able to multi-task
