

Security Engineer

COIMBRA, PORTO (PORTUGAL)

We are seeking a talented Security Engineer to reinforce our software security and technical consulting teams and help us build the most secure solutions for our TELCO clients. If you have experience with secure coding practices, penetration and vulnerability testing oriented to mobile and web applications this is the opportunity you are looking for.

Key Responsibilities

- Create and guarantee IT security solutions;
- Execute vulnerability testing, risk analyses and security assessments;
- Develop automation scripts to handle and track incidents;
- Assess threat and security event information from multiple sources to determine root cause and recommend appropriate remediation and recovery actions;
- Deliver technical reports and formal papers on test findings;
- Stay up-to-date with new technologies and processes for improvements in network and software security;
- Respond to information security issues during each stage of a development lifecycle.

Additional Information

- Job Location: Coimbra or Porto (Portugal);
- Position Type: Full-time;
- We offer a competitive compensation package as well as an environment conducive to personal and professional growth

Requirements

- BSc or MSc degree in Computer Science or Computer Engineering, preferably specialized in Software Security;
- + 1 year of experience in a Software Security role;
- Good general knowledge of telecommunications / mobile technologies;
- Good knowledge of VoIP and other network routing methods;
- Good knowledge and experience with IP networking, switching, firewalls and load balancers;
- Strong experience with Unix/Linux and Windows environments;
- Must be able to multi-task and work well under pressure;
- Capable of working independently with minimal supervision;
- Fluent in English, at all levels.
