

Web Engineer

Coimbra, Aveiro, Porto, Leiria - Portugal

We are seeking talented WEB Software Engineers with strong focus on Frontend development (HTML, CSS) and with solid experience with different Javascript frameworks. If you have such skills and you want to develop software applications for the global market this is the opportunity you are looking for.

Key Responsibilities

- Build responsive Web Interfaces that can adjust to Desktop and Mobile web browsers
- Create the interface using state of the art HTML, CSS and JS
- Integrate with the backend using REST
- Leverage the existing web development patterns to create high-performance web sites
- Thoroughly test the developed sites
- Integrate unit testing, automated testing and monitoring into Web apps
- Work closely with product management, other software engineers and quality teams on feature definition and release milestones
- Develop using agile SW development methodology

Requirements

- BSc/MSc in Computer Science/Engineering
- 2 years of experience with Web development
- Knowledge about Angular or React frameworks
- Experience with software design patterns for Web development
- Knowledge about server-side architectures
- Experience in running performance tests
- Proficiency in:
 - HTML5, CSS3 and JavaScript
 - Web code optimization for speed and responsiveness
 - REST and JSON
- Experience with Git or SVN
- Java experience is a plus
- Problem-solving skills
- Self-motivated and able to multitask

Additional Information

- Job Location: Coimbra, Aveiro, Porto, Leiria (Portugal)
- Position Type: Full-time
- We offer a competitive compensation package as well as an environment conducive to personal and professional growth
