

Web Software Developer

Coimbra, Porto, Leiria, Aveiro - Portugal

We are seeking talented Software Engineers with special skills in Web programming (HTML, CSS, JS and Server-side), databases, networking and middleware. If you have such skills and you want to develop software applications for the global market this is the opportunity you are looking for.

Key Responsibilities

- Develop, deploy and maintain Web2.0-based applications
- Development at Browser-side (HTML, CSS and JS)
- Development at Server-side (Java or .Net) is a plus
- Keep up with the most recent Web frameworks, technologies and design patterns
- Work closely with product management, other software engineers and quality teams on feature definition and release milestones
- Perform peer code-reviews and unit-testing for high-quality software
- Use Agile development methodology

Additional Information

- **Job Location:** Coimbra, Porto, Leiria, Lisboa, Aveiro (Portugal)
- **Position Type:** Full-time
- We offer a competitive compensation package as well as an environment conducive to personal and professional growth

Requirements

- BSc or MSc on Computer Science or Computer Engineering
- 3+ years development experience using Web technologies
- Solid Experience in HTML5, CSS and Javascript
- Experience on developing Fast, Modular and Memory-Efficient Javascript frameworks
- Knowledge of web architectures and integration of services
- Experience in JSON/XML and REST
- Experience with WURFL/WNG, JQueryMobile or SenchaTouch
- Understand the limitations and heterogeneities of Web-Browsers and Mobile Browsers
- Knowledge about Server-side programming and Databases
- Experience with a version control system
- Must have excellent problem solving skills
- Must be self-motivated and able to multi-task

Please explain in your CV your existing portfolio in:

1. Development of Web-Sites (browser-side)
2. Development of Web-Sites and Web Applications (server-side)
3. Development of Mobile Web Applications
