

Java / Apache Cassandra Developer

Aveiro, Coimbra, Leiria, Porto - Portugal

We are seeking talented Software Engineers with special skills in infrastructure development, systems design and an exceptional degree of rigour in engineering, to join our team. If you have these sort of skills and you want to develop software applications for the global market this is the opportunity you are looking for.

Key Responsibilities

- Design and develop NoSQL data-base systems that are reliable, scalable, trusted, fast and easy to maintain.
- Work closely with product management, other software engineers and quality teams on feature definition and release milestones
- Perform peer code-reviews and unit-testing to ensure high-quality software
- Use agile development methodology.

Additional Information

- Job location: Coimbra, Porto, Aveiro, Leiria (Portugal)
- Position Type: Full-time
- We offer a competitive compensation package as well as an environment conducive to personal and professional growth.

Requirements

- BSc or MSc on Computer Science or Computer Engineering
- 3+ years development experience using Java language
- Experience with Hadoop, Cassandra or other big data technologies
- Experience designing and developing large scale applications servers is preferred
- Strong understanding of Data Modeling and Database Administration in Cassandra or similar NoSQL technologies
- Must have excellent problem solving skills
- Must be self-motivated and able to multi-task
